Pfannenber exhibiting and speaking on FeuerTrutz 2019 for the first time

Hamburg, 15 January 2019. **FeuerTrutz** will be taking place in Nuremberg again from **20 - 21 February 2019**. **Pfannenber** will be presenting its **signaling solutions and concepts** for the first time in **Hall 10.0, Booth 427** at **Europe's leading trade fair**, which combines structural as well as organizational **fire protection solutions**. It informs trade visitors about innovative solutions and products for fire prevention and fire containment. In the exhibitor forums, visitors also receive competent specialist knowledge from the field.

In a lecture on **Wednesday, February 20 at 13:00** in the **Expert Talks Arena, Hall 10.1, Booth 500** Mark Egbers, Sales Manager Signaling Technology EMEA at Pfannenber, talks about the **standard-compliant signaling devices according to EN 54-3 / -23** using the planning method "**Pfannenber 3D Coverage**".

Visitors gain insight into what constitutes a well thought-out, standard-compliant and effective signaling concept. Practical examples of project planning for signaling devices according to EN 54-3 / -23 with Pfannenber 3D Coverage and the Pfannenber Sizing Software (PSS) will show an effective concept from the planning stage to its implementation. Planners are thus enabled to create a signaling concept that takes account of the actual performance of signaling devices in a given space under real environmental conditions.

About Pfannenber

Pfannenber is a medium-sized company which provides innovative and high-quality electro-technology for industry. Today, the company belongs to the global players of this industry with its headquarters in Hamburg, Germany and its locations in Brazil, China, England, France, Italy, Russia, Singapore and the USA. The product portfolio comprises components and system solutions for the thermal management of electrical enclosures, chillers, visible and audible signaling technology and custom solutions. A special highlight in the Pfannenber portfolio is the designed illuminations which are commissioned by architects, designers, and urban and spatial planners: www.pfannenber.com/en/solutions/industries/art-illumination/.
